# Foreign Services

Foreign Services include Foreign Exchange services (FX), Foreign Central Office (FCO) services and Foreign Zone (FZ) services. This section provides a generic explanation of these services and the applicable terminology. However, these services vary by state. Please refer to the appropriate section for specific state information.

When negotiating with end-users to select the appropriate foreign service, follow the processes outlined in the Foreign Services Flow Charts, following this introductory section. These charts are:

1. Identify the Needed Foreign ANC
2. Identify Wire Centers of Normal and Requested Foreign ANCs
3. Determine Type of Foreign Service
4. Identify Foreign Exchange and Foreign Exchange/Foreign Central Office
5. Identify Foreign Zone and Foreign Central Office

After following these steps, follow order negotiation steps in this handbook.

## Terminology/Basic Information

- **Exchange** -- one or more central office within a specified area

NOTE: Wire Center, Exchange Office and Central Office all pertain to an "Exchange."

- An exchange is a geographical area with specific boundaries, within which end-users can locally.
- A Metropolitan Exchange is an exchange so large that it must be sub-divided into rate zones.

**Example:** There are two metropolitan exchanges in Maryland: **BMET** and **WMEA**.

- **Zone** -- a subdivision of a metropolitan exchange.
  - Zone-to-zone calling within the same Met-Exchange is a local call.
  - Each zone within the Met-Exchange may call certain exchanges outside the Met-Exchange as a local call. This capability varies depending on each zone's physical location.
- **Foreign Exchange (FX)**-- An exchange other than the end-user's normal exchange, which provides service for the end-user.

Foreign Exchange service crosses LATA boundaries in designated areas per the FCC. This is known as InterLATA exceptions. These are included in this section of the handbook.

- The CS FIDs for interLATA exceptions are:
- FRZTG for residence

## Foreign Services – Introduction

- FXSTG for business

Foreign Exchanges services are further identified in relation to boundaries between normal and requested Foreign Exchanges. See below.

- **Contiguous** -- Two exchanges share a common boundary. When one of the exchanges is a metropolitan exchange, the zone within the metropolitan exchange must share the boundary with the other exchange to be contiguous.
  - Apply these USOCs:
    - 1LHBN (PBX-1LHAN) when call between normal and requested ANCs is local
    - 1LHB5 (PBX-1LHA5) when call between normal and requested FX ANCs is toll
- **Non-Contiguous** -- Exchanges do not share a common boundary. When one of the exchanges is a metropolitan exchange, any zone that does not share a boundary with the other exchange is non-contiguous.
  - Apply these USOCs:
    - 1LHBS (PBX-1LHAS) when call between normal and requested FX ANCs is local; also use 2UELC channel terminals.
    - 1LHB4 (PBX-1LHA4) when call between normal and requested FX ANCs is toll; also use two 2UETL channel terminals.
- **Met FX** (second tier Met-FX) -- An exchange that is contiguous to an exchange that is contiguous to a zone of a metropolitan exchange; used to obtain Met calling. A local telephone number is not required by the tariff with Met-FX.
  - Apply these USOCs:
    - 1LHBL (PBX-1LHAL) when call between normal and requested FX ANCs is local
    - 1LHB7 (PBX-1LHA7) when call between normal and requested FX ANCs is toll
- **Foreign Zone (FZ)** -- Service is provided between zones within a Met-Exchange and does not extend beyond its boundaries. Mileage is measured in quarter miles (air miles) from the end-user's physical location in the normal zone to the nearest point on the boundary of the requested foreign zone.
- **Foreign Central Office (FCO)**-- Service is provided from one central office to another within the same exchange or zone. This service may be combined with FX or FZ.
- **Foreign Exchange/Foreign Central Office** -- Service is provided from an exchange other than the end-user's normal exchange **and** from a requested wire center different from the requested foreign exchange's normal serving wire center.

After the FX mileage is calculated, the FCO mileage is measured from the normal serving wire center (**not** from the end-user's LSO) to the requested foreign wire center. (Call the CSSC for mileage information.)

---

## Foreign Services – Introduction

- **Foreign Zone/Foreign Central Office** -- Service is provided between normal and requested foreign zones in a Met-Exchange **and** from a requested wire center different from the normal serving wire center for the requested foreign zone.

After the FZ mileage is calculated, the FCO mileage is measured from the normal service wire center (**not** from the end-user's LSO) to the requested foreign wire center. (Call the CSSC for mileage information.)

- **Local Channels/Co-loops** -- the wiring and facilities required for the part of the service that extends from the end-user's premises to the normal serving central office
- **Interexchange Channel** -- connects two or more exchanges. Is required when the two locations are in different central offices within the same exchange. Mileage is measured by air miles between serving central offices.
- **Transmission Function** -- the equipment necessary to adapt a circuit to the station interface requirements and bring transmission characteristics into objective range

**Note:** Also known as channel terminals.

### ***Geographic areas that determine rates and calling areas***

- **LATA (Local Access Transport Area)** -- the largest geographical area within a region tariffed to establish local and toll service territories for the local companies.

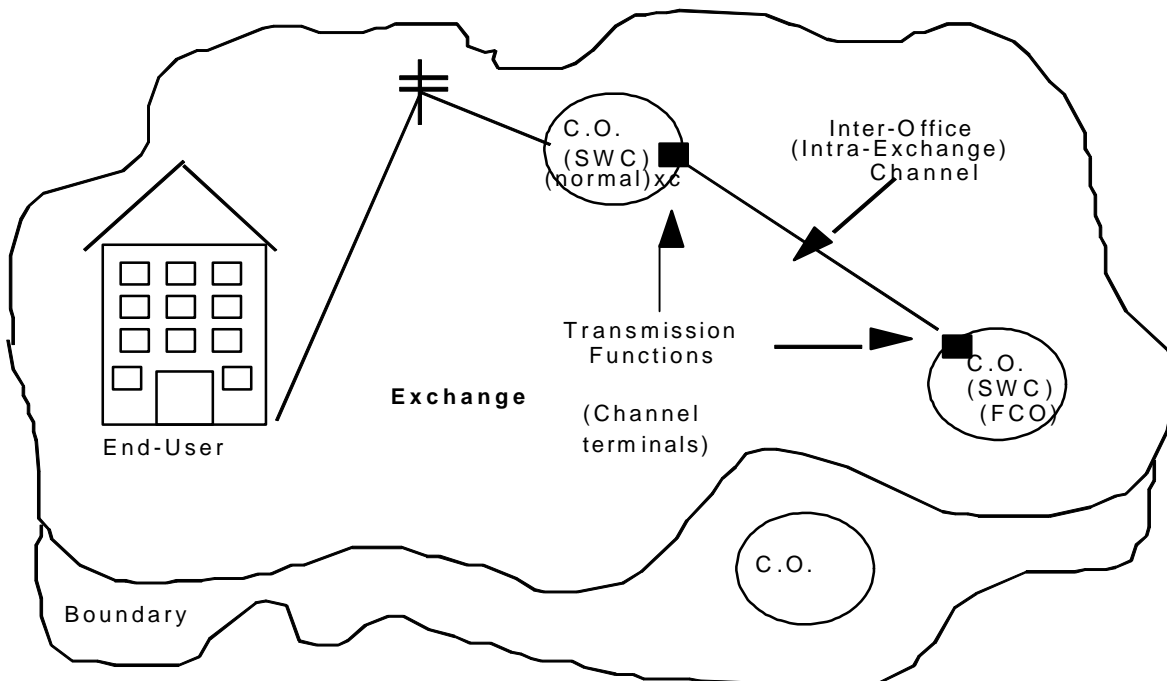

**Example: There are four Maryland LATAs:**

- Baltimore (238)
  - Hagerstown (240)
  - Salisbury (242)
  - Washington (236)
- LATA relationships:
    - IntraLATA -- within a LATA
    - InterLATA -- between two LATAs

## Foreign Central Office (FCO)

This service is available in a multi-office exchange. Service is furnished from a central office serving an area other than the area in which the end-user is located. It is a detariffed, discretionary service.

- Furnished with individual line or branch exchange service (Not provided for use with semi-pub.)
- Mileage charges are based on air miles between the normal serving wire center and the foreign serving wire center.

This diagram shows the end-user's location, with the line running to the pole and then to the normal central office that would serve the end-user. In this case, the end-user has requested a foreign central office (FCO) within the same exchange. Note that this is a multi-office exchange area. There is another central office located in a neighboring (contiguous) exchange area below the one in which the end-user is located.

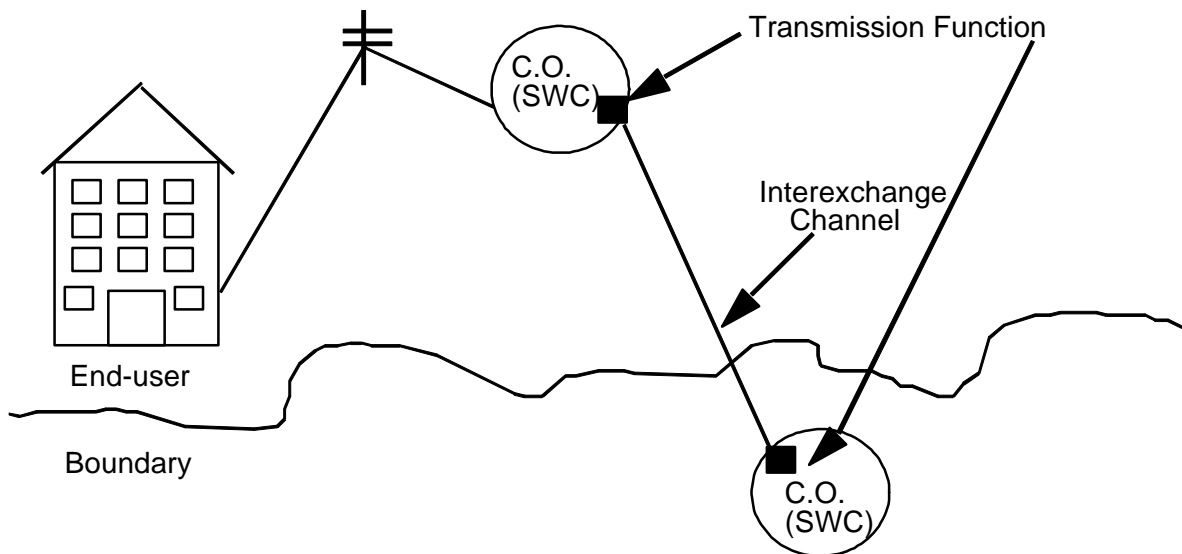

**Billing components** for Foreign Central Office services include:

- Dial Tone Line Charge
- Line Cost Charge
- Interoffice Channel
- Two Transmission Functions

## Foreign Exchange (FX) Service

This service applies when service is furnished from an exchange other than the one in which the end-user is located. It is a detariffed, discretionary service.

- End-user cannot have concurrent services at different locations with the same foreign service telephone number.
- Service is furnished with individual lines only (not provided with semi-public coin service).
- Charges are based on air miles between the wire centers of the two exchanges.

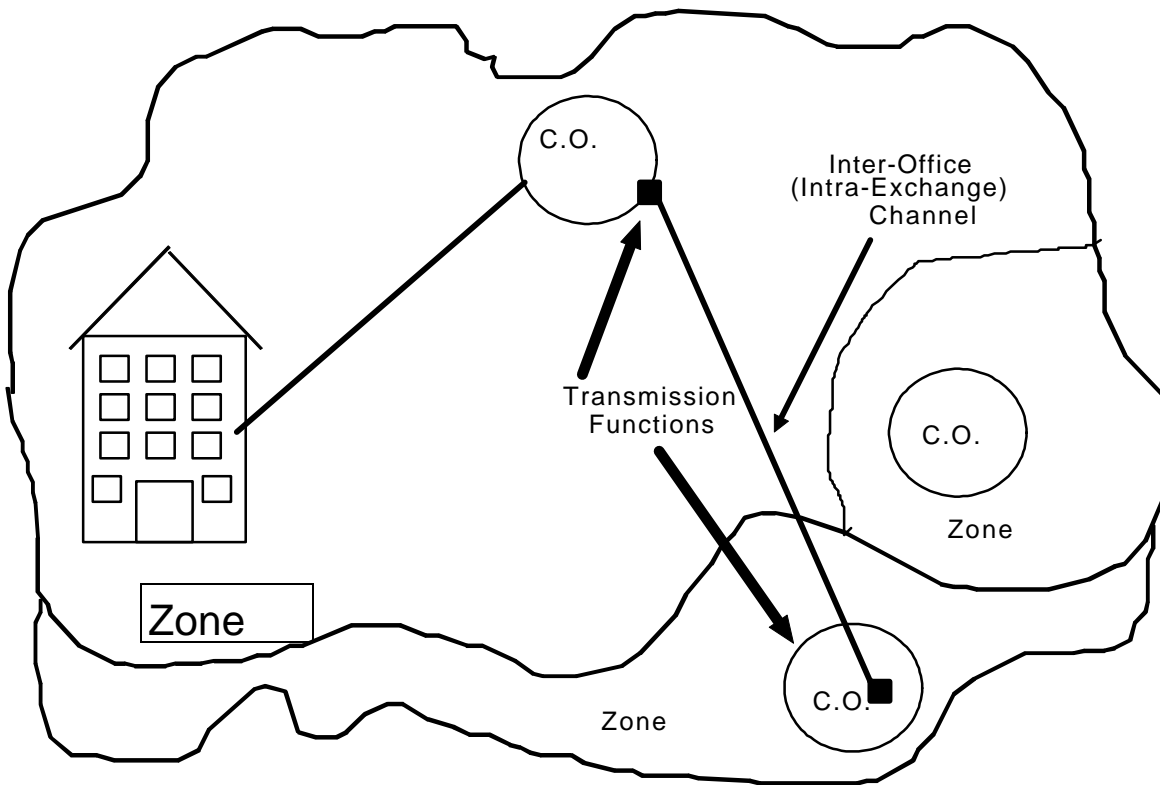

This diagram shows the end-user being served by a central office outside the boundary of the exchange area in which the end-user is located.

**Billing Components** for Foreign Exchange Office services include:

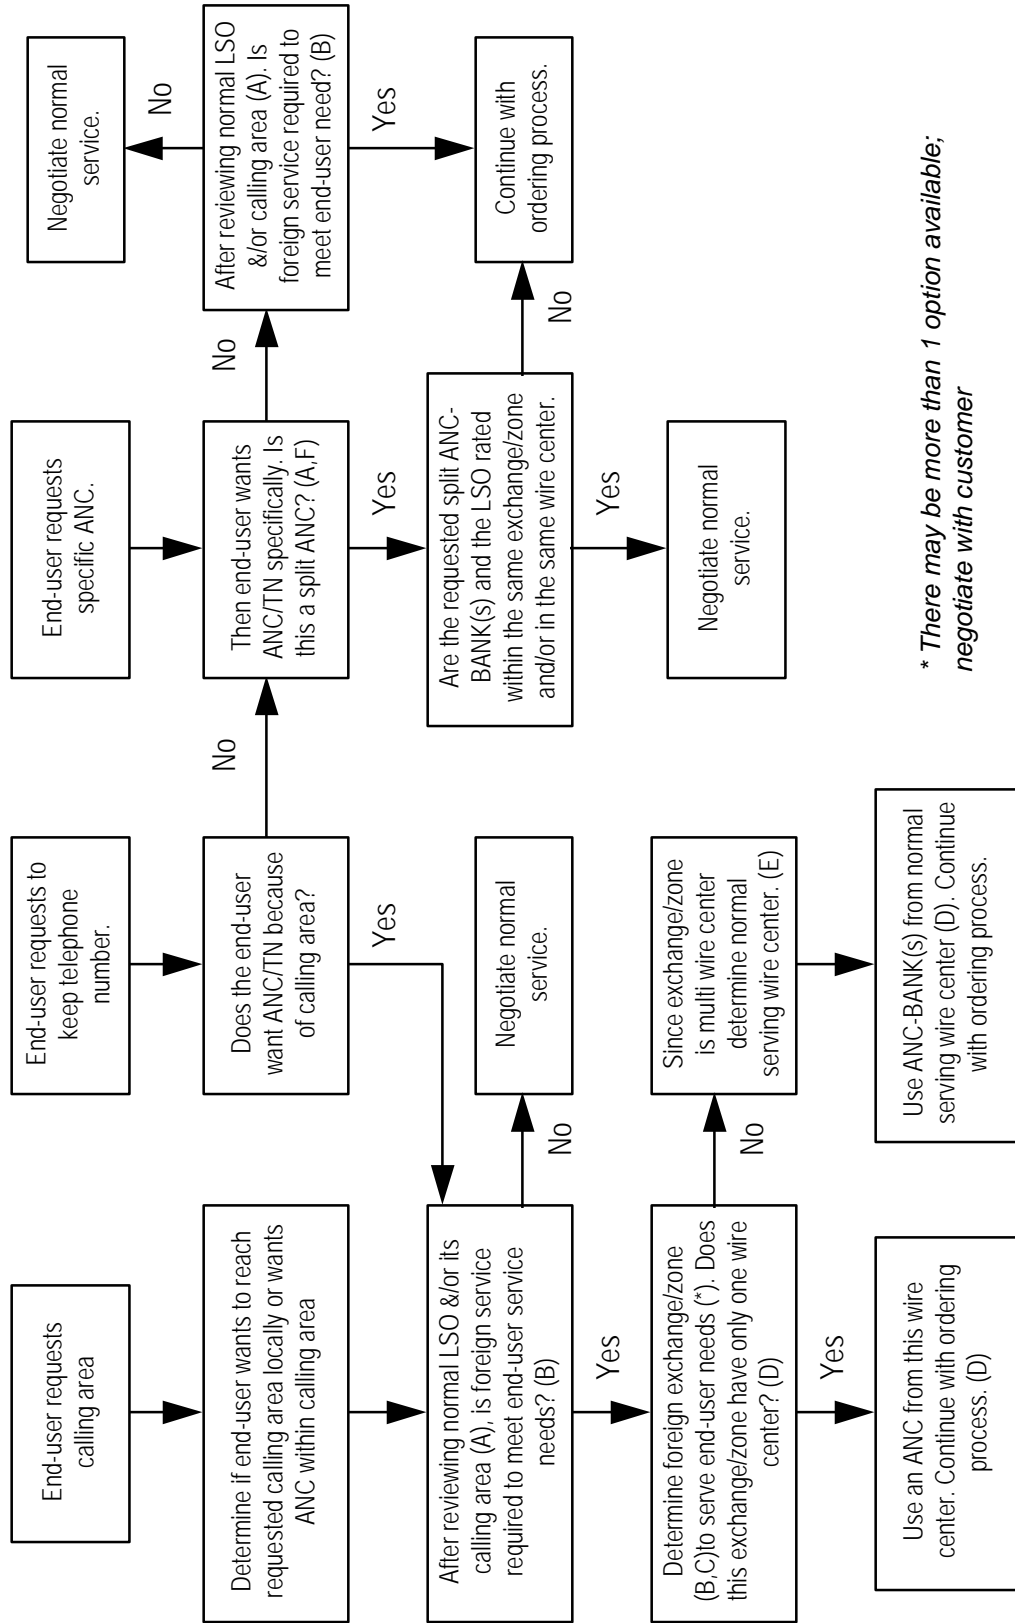

- Dial Tone Line charge
- Line Cost charge
- Interexchange Channel
- Two Transmission Functions

### Metropolitan Exchange Area - Foreign Zone (FZ)

This diagram shows the end-user being served by a central office within a metropolitan exchange area from a zone other than the zone where the end-user's dial tone would normally originate.

**Provisions:**

- For service within WMEA to DC or VA, lines take the rate and connection charges of the Foreign Zone (MD); other services and equipment are rated OCT, and other company service charges apply. This includes a charge for the line connection in the normal zone.
- For FZ mileage, call the CSSC.
- Federal Tax applies.

**Foreign Exchange (FX) Service**

Foreign exchange service is service furnished from an exchange other than the one in which the customer is physically located. Mileage is measured as air miles between the rate centers of the normal and foreign exchanges.

**Foreign Exchange Contiguous – Flat Rates**

**NOTE:** Contiguous means the boundary of the foreign exchange touches the boundary of the local exchange at any point along the boundary.

Equipment	USOC	Monthly Rate
Individual Line	Local 1LHBN	
PBX Trunk	Local 1LHAN	

**Foreign Exchange Non-Contiguous – Rate Center to Rate Center**

## Normal Serving Wire Center for FX or FZ Service

When a customer wants a particular calling area that is serviced by a wire center other than the one providing the customer's current dial tone, use this chart to determine where the dial tone will be provisioned to allow the customer to call the desired area locally.

### *How to Use These Charts*

1. Locate the end-user's physical wire center in the first vertical column.
2. Move to the right until you are in the column headed by the area the customer wants to call.
3. The office location at that crosspoint is the normal serving wire center for FX or FZ.

**NOTE:** If service from a different wire center is requested, Foreign Central Office (FCO) mileage from the requested wire center to the normal wire is added to the FX, FZ or Basic Rate.

### Provisions

- No DC mileage applies to DC FZ service. FCO mileage is applicable if it is a combination of FZ and FCO service.
- Lines take DC monthly rate and connection charges. All other equipment is rated IOCT and other company connection charges apply.
- Do not use the mileage chart for measuring FZ mileage. Call the CSSC.

## West Virginia

West Virginia has minimal requests for foreign services, since the calling bands and calling circles are able to meet the requirements of most customers.
